

The Bio-Compatibility System at work

This safe, accurate hair analysis test and programme have yielded dramatic results.

Here is just one of many real life examples of how the Bio-Compatibility System has changed the lives of our clients:

Real life example...

Bianca Baker was at her wits end when she decided to give the Bio-Compatibility System a go.

Her son, Kingston, was four weeks old when she stopped breastfeeding him, and, shortly after, his behaviour changed dramatically.

Although he slept through the nights, he cried inconsolably all day.

"I was getting depressed," said Bianca. "And you get to the point where you don't enjoy being a mum. It was so taxing."

Bianca admits that she was sceptical about hair analysis at first, but the results made sense and following the programme has made all the difference in Kingston and his family's lives.

The results showed Kingston was reacting badly to his formula and a dishwashing liquid Bianca was using to wash his bottles. By avoiding these, Kingston was restored to his former happy self.

"If we hadn't done that test, I hate to think where we'd be," said a grateful Bianca.

Have you spent all (or part) of your life suffering?

Whether it's with a persistent headache, sinusitis, or something more severe, such as migraines, asthma, arthritis, irritable bowel syndrome, A.D.H.D. or any of thousands of ailments... **you'll be glad to know there's a tried and tested way to change your life.**

THE BIO-COMPATABILITY SYSTEM COMPRISES:

1. A **revolutionary hair analysis test** that offers an in-depth examination of your current health status.
2. A **restorative programme** that is easily integrated into your existing lifestyle — so it's easy to adopt and stick to.

A programme as unique as you are!

The Bio-Compatibility programme (derived from your test results) is NOT a 'one-size-fits-all' solution, but, instead, it represents your individual requirements and responses.

The results of the test offer an in-depth picture of your individual health status and requirements. As such, it forms a solid foundation upon which your practitioner can develop a personalised client care programme for you.

As a result of its effectiveness in this area, it's become widely regarded as the essential analysis tool for proactive professionals — especially those who want to go beyond treating the symptoms to offering a holistic approach to wellness.

What's the next step?

If you'd like to know more about the test, talk to your health care practitioner.

He/she will explain all you need to know about the test and the programme and what is required.

When you're ready to make a commitment to your health and unlock the simple secrets to a healthier, happier you:

Simply ask your practitioner...

To help you fill in the form and attach a hair sample.

You'll be amazed at how dramatic the change in your life can be.

Practitioner

DISCLAIMER: This programme is not intended to be construed as medical advice, nor is it intended to lead anyone away from a qualified health practitioner. We make no claims to cure, diagnose, treat or prevent any disease. We cannot take responsibility for those who may want to help themselves outside of our instructions. If you have a medical condition, we urge you to be supervised by a qualified health practitioner of your choice.

You don't have to suffer through life...

Let your hair unlock the secrets to a healthier, happier you.

Here's how a simple hair analysis test can change your life...

The hair analysis test and wellness programme are the result of more than 30 years of research and development by an experienced natural health practitioner.

Behind the test lies the principle that 'dis-ease' (suffering) in your body is aggravated by certain foods and/or products interfering with your immune system and preventing it from working properly.

Find out what you CAN eat/use

The test results highlight which foods and products are RIGHT for YOUR body AND which are NOT.

Feeding your body correctly frees up your immune system to deal with any other issues more effectively. This means that by following the programme, your immune system gets to deal with each issue in a way that works best for your body.

You'll see a lasting change because the programme is working at the very root of the issue - NOT just masking your symptoms.

How does the test work?

The test uses modern, electronic equipment to measure your body's compatibility against our standard list of 400 common LOCAL foods and household products — including all food groups, and bathroom, laundry, and kitchen products.

It is SAFE, painless, and accurate. It involves NO needles or blood samples, just a piece of your hair.

Once it's done, your practitioner will have the valuable information he/she needs to develop an effective, individual client care protocol for you.

We also have two speciality lists — one for testing babies and another for pets. Talk to your practitioner about these.

Our 500 standard list includes...

GREEN VEGETABLES
Asparagus
Beans
Bokchoy
Brussell Sprouts
Cabbage
Celery
Choy sum
Lettuce
Olives
Parsley
Rocket
Shallots
Snow Peas
